**REACH - Statement of conformity**

The law on chemicals, REACH (Registration, Evaluation, Authorization and Restriction of Chemicals), entered into force on June 1, 2007. The aim of Reach is to improve the protection of human health and the environment through earlier and more substantial identification procedures of the properties of chemical substances.

The company, Yaskawa Europe GmbH, hereby declares to be in compliance with the Regulation EC no 1907/2006 of the European Parliament and of the Council of December 18, 2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH).

According to the article 33 (1) of REACH, the supplier is obliged to communicate information on substances in their products. Suppliers must inform the substances if they contain more than 0.1 % weight by weight (w/w) at a minimum with the name of the substances.

Yaskawa is constantly monitoring the substances of very high concern (SVHC), as defined by REACH in our products. This is an on-going process since the candidate list is released in stages and is not complete.

Yaskawa works closely with their suppliers of components to obtain information about SVHC and we register into the European Chemical Agency (ECHA) Scip Database for SVHC substances in our products.

The aim for Yaskawa is to decrease the use of components that contain SVHC substances, it is also a consideration within our supply chain to choose compliant materials.

If you should have any further questions don't hesitate to contact us.
