

Our business policy

YASKAWA Nordic AB

We will use our resources and accumulated knowledge to, with high delivery precision, provide products and automated systems with quality expected by the customer, security and level of technology.

We work in and develop reliable processes, capable of meeting the requirements placed on us.

Our Operating System supports and coordinates our processes as well as the work of continuous development and improvement in quality, environment and work environment.

Our purpose is to meet the requirements and expectations placed on us by our customers, stakeholders in our organization and in current legislation and regulations during all phases of our products' life cycle from design and development to final waste management.

We take responsibility for sustainable development, as well as pollution prevention through active environmental work, based on our significant environmental aspects. We work to protect and safeguard the environment by controlling the entire product development and production process, the company's waste management and the use of chemical products during production.

We work in an equal and drug-free organization - where our work is characterized by joy and respect for our customers, our company, our employees and our environment.
